Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 17, drawn to a method and apparatus for comminuting and separating material, classified in class 241, subclass 24.17.
- II. Claims 18 to 47, drawn to methods and apparatus for cryogenically reducing material, classified in class 241, subclass 23.
- III. Claims 48 to 52, drawn to a method of sorting particulate material, classified in class 209, subclass 233.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of each of the groups has separate utility such as use independently of each of the other groups since none of the inventions depend on the features of any of the other inventions to function as claimed; for example, the comminuting and separating of Group I can be used without the cryogenic processing of Group II or the sorting of Group III. The inventions of each of the groups can be independently used in like manner. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, and vice versa, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
